ATM Distributor

TRANSFER INFORMATION TO YOUR ATMS - QUICKLY AND EFFICIENTLY WITHOUT LEAVING YOUR DESK

Update the entire fleet of ATMs with the latest Software, Branding and Marketing updates

ATMInsight Distributor is a software distribution tool for remote management of ATM software, branding and marketing, including graphics, software updates, applications, audio/video files, etc. to be distributed to ATM fleets.

ATMInsight Distributor allows fast automated mass distribution of updates

banks to centrally manage the distribution of software and marketing updates to its ATM fleet.

Software and marketing updates can be applied to a selection of ATMs or the entire fleet of ATMs.

Transfer information to your ATMs - quickly and efficiently without leaving your desk.

ATMInsight Distributor is a highly effective tool to update the entire fleet of ATMs with the latest software, branding and marketing updates

Reduce Costs

By centrally updating ATMs there is no need to visit ATMs or use other manual methods to transfer information.

Efficiency & Speed

The entire fleet of ATMs can be updated in a single operation simultaneously—faster than the operating system methods.

Faster Technology

Guaranteed to be faster than Windows system copy methods by using unique compression technology.

Key features and benefits:

- Automated mass simultaneous distribution of software, graphics, software updates and branding updates
- Cost reduction by centralising the distribution from a central location
- Dynamically update ATM graphics, audio files, branding, etc. centrally
- Secure and fast (faster than Windows system copy methods or using ATM Switch connection)
- ATMInsight Distributor is independent of ATM driving Switch
