

PRINT PIN MAILERS SECURELY AT DIFFERENT LOCATIONS OF YOUR CHOICE: IN ANOTHER ROOM, BUILDING, BRANCH, CITY OR OTHER LOCATION

COST REDUCTION BY USING ONE CENTRAL HARDWARE SECURITY MODULE (HSM)

PINEXPRESS REMOTE PIN MAILER IS INDEPENDENT OF ATM DRIVING SWITCH OR CARD PRODUCTION SYSTEM

Usagi Ebanking Innovation

Remote PIN Mailer

STREAMLINE PIN MAILER PRODUCTION AT DIFFERENT LOCATIONS SAFELY & SECURELY WITH PINEXPRESS REMOTE PIN MAILER

Print PIN Mailers At Any Chosen Location

PINExpress is a solution that uses the existing central HSM to print PIN mailers securely over the bank's LAN and WAN. PIN Mailers can be printed at any chosen location using only one central HSM and without changes in the existing infrastructure.

No additional hardware is required (except for extra PIN mailer printers at the

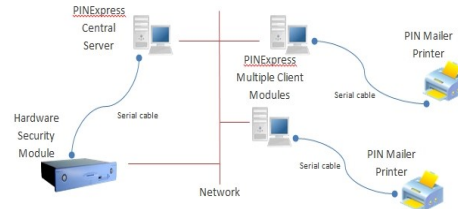

specified branches or locations).

The solution encompasses enhanced security features to safeguard data and complies with industry security standards.

PINExpress Remote PIN Mailer allows PIN mailers to be printed at any location

The system supports a number of HSMs including the Thales PayShield 9000 and Thales 8000 HSMs and is instantly deployable.

PINExpress Remote PIN Mailer is a highly effective tool to instantly print PIN Mailers at a desired branch or other location

Key features and benefits:

- Uses the existing central HSM to print PIN mailers securely over the bank's LAN and WAN
- PIN Mailers can be conveniently printed at any chosen location using one central HSM
- Requires no changes in the existing infrastructure or extra hardware
- Plug & play / Instant deployment
- Independent of Switch or Card Personalisation system
- Supports popular HSMs including Thales PayShield 9000 and Thales 8000 HSMs
- Enhanced security features to safeguard data

Reduce Costs

By using one central HSM to print PIN Mailers at different desired locations.

No Changes

The solution can be deployed without making any changes to existing infrastructure.

Secure & Fast

Uses enhanced security features to safeguard data delivery without affecting performance.
